Getting started checklist

Before we begin, we need to check a few things:

Enable Bluetooth

Bluetooth is enabled

Enable Notifications

COMPANY uses notifications to alert you when your screen is turned off or the app is running in the background

Notifications are enabled

Prioritize Important Alerts

COMPANY can alert you to important events, even when your device is silenced or set to Do Not Disturb

Prioritization is enabled

Enable Wi-Fi

Wi-Fi is enabled

Charge the Probe

Your **BRAND** probes need to be charged for at least 4 hours before use

Probes are charged

Safety and Compliance

You must read the Safety and Compliance Manual to continue

NOTIFICATIONS

Notifications Expire Automatically

Notification in the APP will disappear after specified time when enabled or will remain on-screen and will continue to play sounds and/or vibrate your smart device until you dismiss them (default 10 seconds).

Notify Me 5 Mins Before Cook Ends

The APP will notify you automatically when specified time of cooking time remain (default 5 minutes).

Prioritise Important Alerts

Important alerts will be prompted anyway by ignoring "mute" and "do not disturb" settings of your device.

PAIRED DEVICES

Add or Remove Devices

POWER SAVING

Keep Screen On During Cook

The APP will keep your smart device screen turned on when a cook is in progress but you can still turn it off manually.

Please note that using this setting will consume more battery power of your smart device when it is enabled. To avoid lost of connection, please keep your smart device plugged in and charging during a long cook.

Setup Cook

Inserting your Probe

Insert your probe into the middle of the thickest part of the meat.

If possible, ensure the portion up to the arrow is inside the meat.

The groove on the device must be fully inside the meat. Failing to insert the Probe correctly can damage the Probe device.

How to insert your Probe

Don't Show This Message Again

Setup Cook

Probe Charger

Your Probe Charger should be kept as close as possible to your cooker to stay connected to the probe and boost the signal.

Just make sure you don't leave it on any hot surfaces!

USDA COMPLIANCE

The temperatures marked with USDA-Safe icon indicates the compliance with The United States Department of Agriculture which recommends an internal temperature of at least 145 F (63 C) for cuts of beef, veal, and lamb in order to prevent foodborne illness, and warns that color and texture indicators are not reliable. The same meats should be thoroughly cooked to 160 F (71 C) when ground or tenderized by cutting, since these processes distribute bacteria throughout the meat,
